

## whole home control

Imagine a group wants to watch a movie in the den while others listen to Satellite Radio by the pool. From bedrooms, bathrooms, and guest rooms to the kitchen, patio and Home Theater - you can enjoy rich, warm, vibrant sounds from up to eight audio sources in up to 16 different zones. But distributed audio and a media room are just part of the

Whole Home Control experience. Imagine your shades and lighting working in perfect harmony to fill your home with natural light. And a glance of your Touch Panel not only provides the current indoor and outdoor temperature, but a full five-day forecast. This is Whole Home Control from AMXhome. Enjoying the simple life is just a touch away.

Select the music you want to hear in each room and control volume from one central location or in each room with local room audio controls.

Use a touch panel or remote control for a room to send any video source to the display device in the room, and control the functions of that source.

Select the program material to be viewed in the media room from cable, satellite, media server, DVD, or other sources including security cameras

Turn lights on when you come home at night, turn lights off from your bedside, or set lighting presets for nighttime pathways or the perfect lighting for entertaining.

Adjust your temperature, or set a time program for temperature settings to automatically change throughout the day, or set vacation temperature levels.

Set the temperature or adjust the heaters, pumps, or jets for relaxing in the spa or for a refreshing swim in the pool.

With a simple to use touch panel interface, AMXhome Energy Management is ideal for monitoring energy consumption and managing energy usage providing both a cost-savings and a positive environmental impact.
